

Health Proxie

Android app based solution to search hospital using Geo-fence.

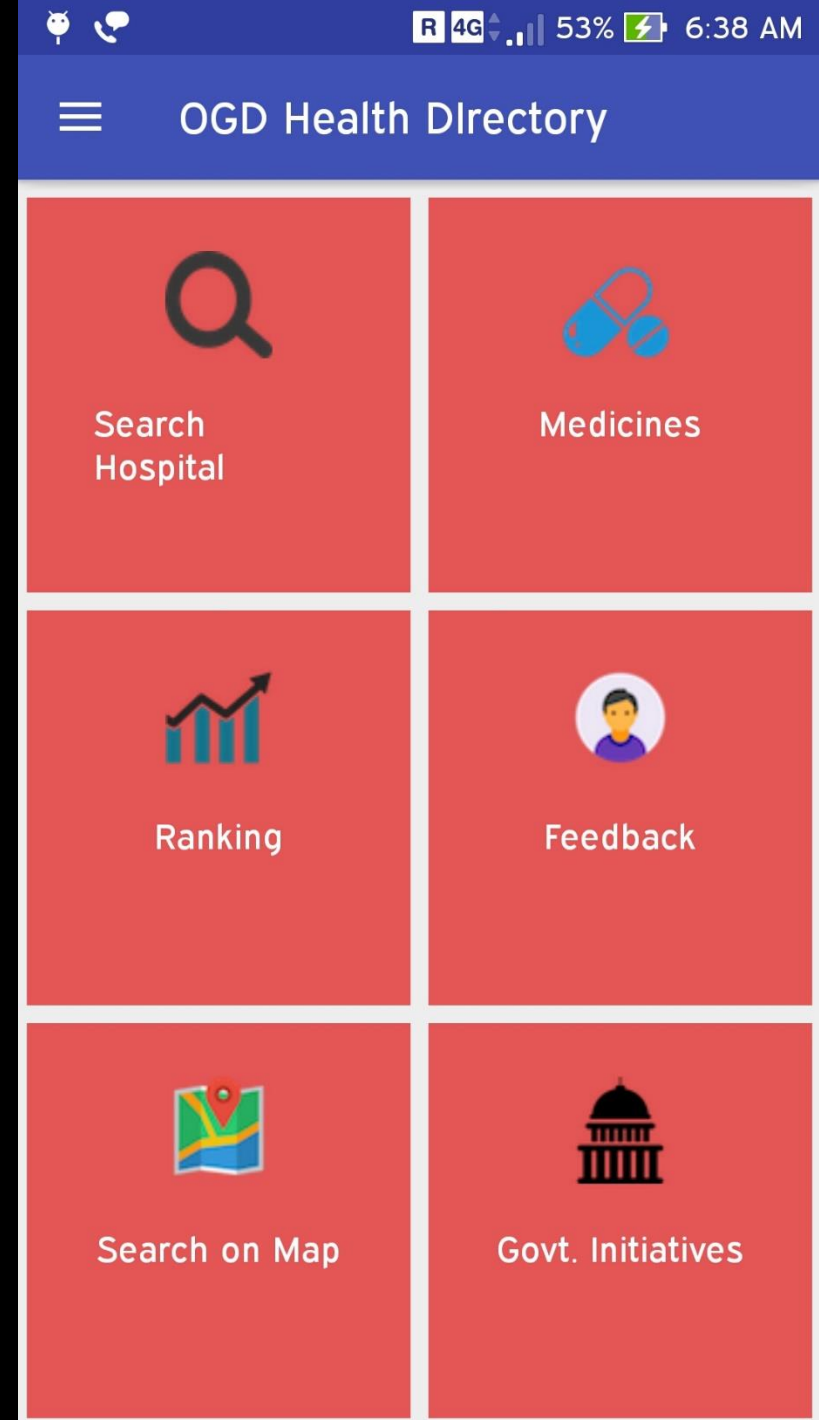

Background of the problem and Need/Goal of this app

- Health was always been a dilapidated sector because of no health policy present.
- New National Health Policy aims to achieve Universal Health Coverage with a bigger share of E-Health.
- This is app-based solution for searching and finding hospitals near your location.
- Our solution goal is to Inform, Clarify, Strengthen, Prioritize the role of government in shaping Health sector.

Brief Description

- This app has mainly 6 components:

1. Search Hospital
2. Medicines
3. Ranking
4. Suggestions/Complaints
5. Find on the Map
6. Government initiatives

Future Upgradations

- New parameters can be added for reviewing hospitals.
- As the Health ministry and NITI Aayog proposed a framework to let private hospitals run selected services within district hospitals. If the dataset will be made available, we can provide info regarding those services too.
- Maintain a Electronic Health Record (EHR) of registered users.

Thank You.
